Every human being has a unique BaZi Profile. This Profile represents our personal frame of reference that consists of our attitudes, assumptions and expectations concerning ourselves, other people and life. This unique set of factors determines whether we are optimistic or pessimistic, happy or sad, jovial or gloomy, trusting or suspicious, friendly or conservative, courageous or shy, patient or temperamental, logical or emotional. These factors color how we see life as well as how we influence or are influenced by others.

INTRODUCTION

Four Pillars of Destiny is a Chinese conceptual term that describes the four components creating a person's destiny or fate. The four components within the moment of birth are year, month, day, and time (hour).

Ba Zi (Eight Characters 八字) or *Four Pillars* as it is popular known in the West, is a sophisticated art of Chinese fortune-telling based largely on the Chinese five-element theory, allowing us to investigate the potential and mysterious of our lives using our birth data. BaZi calculation enable us to explore the cyclical influence of our 'destiny' in terms important areas such as family, friends, relationships, wealth, fame, recognition, career, studies, partnership, business and the almost every other important aspect of our lives. BaZi can be used to evaluate relationships and to forecast the life path of each individual.

An individual can make use of this information to accelerate his performance in work, strengthen his or her relationships with others, improve weaknesses, maximize talents and potentials, and make informed decisions based on forecasts of his or her upcoming cycle of luck.

Understanding our BaZi (our Eight Characters) helps us deal with uncertainties and allows us to understand our strengths and weaknesses in life. Factors such as luck are often indomitable and not within our grasp. BaZi analysis is designed to help us understand the cycles of luck and possibly understand how it influences our lives.

Day master : is the most important reference point in the analysis. From your date of birth, you get a day master which denotes your basic nature and character. It denotes **WHO YOU ARE**

To get a clear idea of the full picture, refer to the chart below:

Level 1 - The Day Master

The Day Master in a nutshell is the BASIC YOU. The inborn personality. It is your essential character. It answers the basic question "WHO AM I". There are ten basic personality profiles - the TEN Day Masters - each with its unique set of personality traits, likes and dislikes.

Level 2 - The Structure

The Structure is your behavior and attitude - in other words, how you use your personality. It expands on the Day Master (Level 1). The structure reveals your natural tendencies in life - are you more controlling, more of a creator, supporter, thinker or connector? Each of the Ten Day Masters express themselves differently through the FIVE Structures. Why do we do the things we do? Why do we like the things we like? - The answers are in our BaZi STRUCTURE.

Level 3 - The Profile

The Profile reveals your unique abilities and skills, the masks that you consciously and unconsciously "put on" as you approach and navigate the world. Your Profile speaks of your ROLES in life. There are TEN roles - or Ten BaZi Profiles. Everyone plays a different role. What makes you happy and what does success mean to you is different to somebody else. Your sense of achievement and sense of purpose in life is unique to your Profile. Your Profile will reveal your unique style.

" Your BaZi Profile reveals how you can get FLOW. It will show you your patterns in work, relationship and social settings. Being AWARE of these patterns is your first step to positive Life Transformation.

Life Transformation - Designing Your Destiny

What is it that shapes our attitudes? It's our character. And how can we change something like our character if we don't know what our character is? That's why it is essential to first begin by being aware of your PROFILE.

I'm sure you've met or even have known people who are their own 'worst enemy.' They always, for some reason, manage to sabotage themselves when success (in the form of a relationship or a dream job, for example) is just within reach.

Who we are - our self-image - can restrict or expand our ability to achieve success in life. A person with an unhealthy self-image or at what I call the "unhealthy levels of their BaZi Profile" will not achieve sustainable success in life because he will eventually bring himself down to the level of his own innate expectations as permissible by the 'health level' of his Profile.

Isn't it strange that human nature seems to provide all of us with the natural ability and instincts to size up or judge everyone else on earth except for ourselves?

Many people know that for things to change, they first need to change themselves. But how can they change, when they don't know WHAT to change? That is why all change - begins with **SELF-AWARENESS**.

Knowing What to Do... and Doing It

Everything you've ever experienced, good or bad is attributed to who you are. Your Profile is your lens to the outside world.

Your Profile chart will also indicate clearly your **Main Profile** as well as its complementary side - that is, your **Sub Profile** (or **Secondary Profile**).

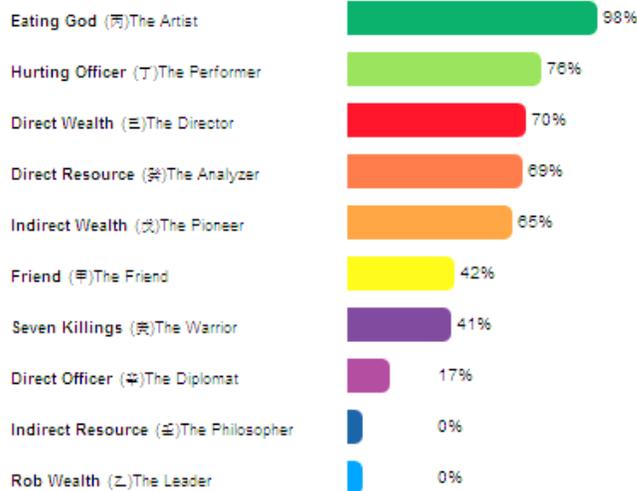

The Main Profile shows your primary role in life while your Sub Profile tells you your secondary role. Both profiles are equally important as human beings are complex creatures. We play different roles in different circumstances and environments in life. Who we are at work can be totally different from who we are at home. In this report, you will also see sections describing your **Intimate Subtype** and **Social Subtype**

Intimate Subtype describes your relationship mask - how you respond, react and behave in a relationship. Your Social Subtype describes your social mask - how you behave with close friends and in the world at large.

You will also discover how your Profile operates in your career, and while under pressure. Learn the types of jobs that are easiest for your Profile to pursue.

Discover what kinds of industries or disciplines towards which you're naturally inclined. And more importantly, learn how to become more effective in your work (10 profiles- roles you play section) .

- the person in question will have a fulfilling career and be happy!

The key aspect to keep in mind is that while wealth generation and money-making are commonly perceived to be the most key aspects of one's career, often it is the journey and process during one's career which are more important. This is because when one is pursuing a field or career that one is truly enjoying, he/she will indeed feel fulfilled.

Health Analysis

Since your Day master in your chart is weak, and its element is :

Wood

As wood represents the gall bladder, liver and limbs, any issues arising related to wood will make these organs problematic. Since wood represents growth, abnormal growths and bodily deformity are also wood problems. In addition, hair loss can also be due to an overly weak wood element.

To balance your chart you need to go as treatments : wood and water

- Wood in form of herbal , eastern medication, organic food
- Water in form of spa treatments, detox diet , juicing
